

**Health Provider Registry now being used by private health care providers.**

The Health Provider Registry is now being used to send GP letters from the Little Company of Mary Health Care group. This follows a successful trial in College Grove Hospital of the integration of the registry data into the group's new IT system.

The Little Company of Mary Health Care group is the second largest private health care provider in South Australia. It consists of Calvary North Adelaide Hospital, Calvary Wakefield Hospital, Calvary College Grove Rehabilitation Hospital and Calvary Central Districts Hospital.

The HPRy team is delighted that the registry now helps to deliver discharge information to GPs from the metropolitan public hospitals, one rural hospital (Mt Gambier) and this our first large private provider group.
